FOREWORD

Thanks for choosing SK series studio flash. It is a lightweight, compact and durable flash with complete functions. Design for shooting studio portrait and e-commerce product. This product is suitable for head shot, waist shoot, and certificate photography, as well as product shooting, etc. It can also offer high light, background light, or hair light in large studios and workshops. The SK flash offers:

- Precise output displayed on LED panel, 20 steps from 1.0 to 3.0 in 0.1 increments
- Use optional FT-16 trigger to control the flash power ratio, modeling lamp and buzzer, as well as flash triggering
- Compact and lightweight body with Bowens mount to add almost any studio light shapers
- 150W modeling lamp adjusts in 9 power levels
- Outstanding output stability, no more than 2% shifts when under the same output
- Anti-preflash function enables synchronization with cameras that have a one-preflash firing system
- Auto memory and recovery of adjusted panel settings

维护保养

- 闪光灯在工作时，如发现异常，应立即关掉电源，查明原因。
- 灯体应避免震动，平时注意表面除尘。
- 灯体稍有发热为正常现象，无特别需要时，勿连续引闪。
- 除灯管与造型灯消耗品允许用户用原厂配置的自行装卸更换外，闪光灯的其他维护概由本厂指定可供原厂配件之维修部负责。
- 1年保修，由于灯管与造型灯为消耗品，不在1年保修范围。
- 擅自检修此闪光灯，经发现将取消闪光灯之一年保修期，维修需要收取相关费用。
- 如果本品出现故障或者被水淋湿，唯有在专业人员维修后方可继续使用。
- 在维修和清洁本品时请断开电源。
- 如有技术更改，恕不另行通知。
Warning

To prevent damage to the product or injury to you or to others, read the following warnings in their entirety before using this product. Keep these safety instructions where users can read them for ready reference.

⚠ Do not disassemble or modify. Should the product break down, send the defective back to the authorized service center for inspection and maintenance.
⚠ Keep dry. Do not handle with wet hands, immerse in water, or expose to rain.
⚠ Keep out of reach of children.
⚠ Please put the device in a ventilation environment and keep the parts of lighting and heat dissipation holes are unobstructed. Do not use in flammable environment.
⚠ As this product adopts make and break device, please keep it easy to be used.
⚠ No touching the heating parts of this product.
⚠ Please turn off the power and wear insulated gloves before installing and connecting accessories. When replacing the tube or modeling lamp, please make sure that the tube is cool and wear insulated gloves to prevent burns.
⚠ Do not flash directly towards naked eyes (especially those of babies), otherwise it may lead to visual impairment.
⚠ Disconnect from the power supply when it will not be used for an extended period.

CAUTION

⚠ After 30 continuous flashes at full power, the flash should be cooled down for about 3 minutes. Overheating will occur if it is used continuously without cooling down.
⚠ Do not keep using the modeling lamp for a long time; otherwise flammable accessories attaching to flash head, e.g. softbox will get burnt. A 10-minute time is recommended in this case. After 10 minutes, cool it down for 1 minute.
⚠ When using a snoot, do not keep the modeling lamp on for a long time or fire too frequently (not over six times for one minute). Overheating will result in damages for strobe housing and/or studio light.
⚠ Avoid sudden impacts as this can damage the flash tube and/or modeling lamp.

NAMES OF PARTS

- Body

01. AC Power Socket
02. Sync Cord Jack
03. Power Switch
04. Up Button
05. Down Button
06. Slave Model Button
07. Modeling Lamp Output Controller
08. BUZZ Button
09. Test Button
10. Digital Display
11. Slave Trigger Indicator
12. Modeling Lamp Indicator
13. Buzz Indicator
14. Test Indicator Lamp
15. Light Sensor
16. Fuse
17. Wireless Control Port
18. Mounting Bracket
19. Umbrella Input
20. Direction Adjusting Handle
• **Accessories**
  1. Power Cord
  2. Lamp Cover
  3. Modeling Lamp
  4. Instruction Manual

• **Separately sold accessories**
The product can be used in combination with the following accessories sold separately, so as to achieve best photography effects:
FT-16 Remote Control, Power Inverter, Softbox, Photographic Umbrella, Light Stand, Barndoor, Snoot, etc.

**OPERATIONS**

• **Flash Preparation**
1. Take down the lamp cover and install the modeling lamp. (If you mount a light shaper on the flash head and want to remove it, press the release button on the flash head. Then turn the light shaper counter-clockwise to take it out, as illustrated in the picture.)
2. Attach the flash unit on an appropriate light stand. Adjust the Mounting Bracket (18) for a good angle and make sure it's tightened and fixed. Use the Direction Adjusting Handle (20) to adjust the flash to a desired direction. Umbrella Input (19) is for different photo umbrellas to put in.

• **Power Connection**
Use the power cord to connect the flash to an AC power source and turn on the Power Switch (3). The Digital Display (10) lights up, indicating it's connected.

• **Modeling Lamp**
Each press on the Modeling Lamp Button (7) will turn the modeling lamp on or off. When the Modeling Lamp Indicator (12) lights up, the lamp is on; if not, the lamp is off.

Press the Modeling Lamp Button (7) and hold for at least 2 seconds to enter the brightness adjusting mode. In this mode, use the Up Button (4) and Down Button (5) to change the output. The modeling lamp can be adjusted in 9 levels (from the lowest L1 to the highest L9).

The modeling lamp will be off automatically after lighting for 2 hours, avoiding overheat due to long-time lighting when the user is not nearby.

![](image)

When there is flammable accessory on the flash unit, do not keep the modeling lamp on for a long time. It is recommended to cool it down for one minute after 10 minutes' working.

• **Power Output Control**
Use the Up Button (4) and Down Button (5) to adjust the power level, so as to satisfy light requirements in different environment. The power is adjustable freely from 1.0 to 3.0 which will be accordingly shown on the Digital Display (10). “OF” on the display indicates that the flash triggering function is turned off. Pressing Test Button to discharge power is required after adjusting power from high to low.

• **Test Button**
To fire the flash without taking a picture, press the Test Button (9). It can also help adjust the flash brightness when combined with the Up Button (4) and Down Button (5).

• **Sync Triggering**
The Sync Cord Jack (2) is a Φ3.50mm plug. Insert a trigger plug here and the flash will be fired synchronously with the camera shutter.

• **Slave Trigger Model**
Three slave triggering models are available and can be set by pressing Slave Model Button (6).
1) No optical control: The Slave Triggering Indicator (11) is off, indicating the slave triggering function is shut down.
2) One fire model: The Slave Triggering Indicator (11) glows blue, indicating the flash will fire synchronously when the master flash fires. In this model, the flash can function as a slave flash, offering various effects of light and shadow.
3) Anti-preflash model: The Slave Triggering Indicator (11) glows red, indicating the flash will ignore a single “preflash” from the master flash and will only fire in response to the second, actual flash from the master. In this model, the flash can function as a slave flash. It is applicable when using a TTL master flash. With this anti-preflash function, synchronization is...
supported with cameras having a one-preflash firing system.

- **Buzz Function**
  The Buzz Button (8) is used to decide whether there is sound reminder for ready flash after recharging. When the Buzz Indicator (12) is on, it means buzz function is working; if it is off, the buzz function is shut down. A “BI” sound will be heard when it’s fully charged.

- **Memory Function**
  The device is equipped with memory function for the panel setting. It will help remember the panel setting 3 seconds after you set it. When starting up the flash next time, the panel setting will be the same as that before powering it off.

- **Wireless Control Function**
  The flash unit is built in with a Wireless Control Port (17) so that you can wirelessly control the on-and-off of your flash, modeling lamp and buzzer, as well as adjust the flash output level, etc.

  To control the flash wirelessly, you need a FT series remote control set (on-camera and on-flash), which is sold separately. Insert its receive end into the Wireless Control Port (17) on the flash and insert the transmit end into the camera hot shoe. Settings made on the hotshoe-mounted transmit and receive ends will be wirelessly communicated to the flash. Then you can press the camera shutter-release button to trigger the flash. You can also hold the transmit end at hand to control your flash.

  For full instructions on the use of FT series remote control, see its user manual.

- **Tube Replacement**
  Shut down the power and remove the power cord before replacing the flash tube and wear insulated gloves. Then, loosen the iron wire on the tube, keep a balanced hold on the two feet of the flash tube and pull out the old tube gently. Take down the feet casing from the old tube and put it on the new one. Hold two feet of the new tube, and target directly towards the two copper outlets, then push them slightly in. Twine the iron wire on the stainless steel sheet to fix the flash tube.

### MAINTENANCE

- Shut down the device immediately when it works abnormally and find out the reason.
- Avoid sudden impacts and the lamp should be dedusted regularly.
- It is normal for the lamp to be warm when in use. Avoid continuous flashes if unnecessary.
- Maintenance of the flash must be performed by our authorized maintenance department which can provide original accessories. The flash-tube and the modeling lamp are user-replaceable. Replacement tubes and lamps can be obtained from the manufacturer.
- This product, except consumables e.g. flash tube and modeling lamp, is supported with a one-year warranty.
- Unauthorized service will void the warranty.
- If the product had failures or was wetted, do not use it until it is repaired by professionals.
- Disconnect the power when cleaning the flash or when changing the flash tube / modeling lamp.
- Changes made to the specifications or designs may not be reflected in this manual.
