

X1R-C 佳能接收器固件说明

- 一、请使用神牛固件升级软件 G3 打开该固件进行升级。G3 可在官网下载。
- 二、版本号查看方法：在接收器关机状态下按住 “GR” 按键不放，然后开机，此时液晶屏显示软件版本号（如 10 版本：10U）。
- 三、版本说明：

版本	更新内容	日期
V26	1. 修复一些小问题。	2022-06-15
V20~V25	1. 与 X1T-C 发射器保持相同版本。	2022-06-15
V19	1. 修复在佳能 600EXII-RT 机顶灯上无法设置 Zoom 135mm, Zoom 200mm 的问题。	2018-08-21
V18	1. 用户可设置 RF ID。方式：同时按住 CH 和 GR 按钮开机，进入 RF ID 设置界面，短按或长按 CH 按钮，增大 ID 值；短按或长按 GR 按钮，减少 ID 值。等待 5s 后关机，ID 值已设置并保存。正常开机，ID 值影响 RF 接收。	2018-01-10
V17	1. 修复使用 Canon 580Ex II 或 430Ex II 在 M 模式下不能正常引闪的问题。	2016-08-29
V16	1. 为兼容 XT-32(从不发送 Mode 设置)，开机模式设置为 M。保留用户在机顶灯的模式设置，直到通过 RF 收到新的模式设置。 2. Multi 模式下，按下 Test 按钮，会持续频闪，直到松开按钮或达到预设闪光次数。	2016-07-18
V15	1. 允许用户改变安装在接收器热靴上的闪灯的模式和输出值。	2016-06-07
V14	1. 修复双击减小频道后，不再接收新频道信号的问题。	2016-04-13
V13	1、与发射器端程序版本保持一致。	2016-03-24
V12	1、增加双击减少设置值的控制。	2016-03-15
V11	1、与发射器端程序版本保持一致。	2016-01-30
V10	1、在 M 或 Multi 模式下，输出功率最小可以设置到 1/256。	2015-12-18
V09	1、接收器 Test 按钮可以控制相机对焦和拍摄。	2015-12-12

V08	2、加强无线抗干扰能力，调整 CH9/CH12/CH15/CH18/CH21/CH24/CH27/CH30 的通道频率，此 8 个通道与旧版本不兼容，请将相关设备进行升级。	2015-11-26
V05	1、解决与相机 1DX 的兼容问题； 2、增加 Multi（频闪闪光功能）；	2015-10-27

注：详细规格请在官网（www.godox.com.cn）下载最新说明书。

X1R-C Receiver (For Canon) Firmware Instructions

1. Please use the Godox firmware upgrade software G3 to open and upgrade the firmware. G3 can be downloaded from the official website.
2. To check the version number, follow these steps: With the receiver powered off, press and hold the "GR" button, then power on the receiver. The LCD screen will display the software version number (e.g., for version 10: 10U).
3. Version Information:

Version	Updated Contents	Date
V26	1. Fixed some minor issues.	2022-06-15
V20~V25	1. Ensured consistency between the receiver and transmitter firmware versions.	2022-06-15
V19	1. Fixed the issue where the 600EXII-RT flash unit could not set the zoom at Zoom 135mm and Zoom 200mm.	2018-08-21
V18	1. Added Feature: User-Settable RF ID. Procedure: Power on the receiver by simultaneously holding down the CH and GR buttons. Enter the RF ID setting interface. Short or long press the CH button to increase the ID value; short or long press the GR button to decrease the ID value. After 5 seconds, power off the receiver to save the set ID value. Upon normal startup, the set ID value will affect RF reception.	2018-01-10
V17	1. Fixed the issue where Canon 580EX II and 430EX II flashes could not be triggered in M mode.	2016-08-29
V16	1. Added support for XT-32 (from XT-32 Mode setting). Set the flash mode to M. (Please refer to the user manual for detailed RF ID setting instructions.) 2. Multi-mode: When pressing the Test button, continuous flash triggering will persist until the button is released.	2016-07-18
V15	1. Enabled users to change the mode and output value of the camera flash that attached on the receiver.	2016-06-07
V14	1. Fixed the issue where the new channel's signal is not received when diminish the channel amount by double-clicking.	2016-04-13
V13	1. Ensured consistency between the receiver and transmitter firmware versions.	2016-03-24
V12	1. Added double-click feature for value setting control.	2016-03-15
V11	1. Ensured consistency between the receiver and transmitter firmware versions.	2016-01-30
V10	1. To set the minimum power output to 1/256 in the M/Multi mode.	2015-12-18

V09	1. Press the Test button of the receiver can control the camera's focus and shooting.	2015-12-12
V08	1. Enhanced wireless anti-interference ability and adjusted CH9/CH12/CH15/CH18/CH21/CH24/CH27/CH30 channel settings. As these 8 channels are not compatible with the old version, please update the relevant devices.	2015-11-26
V05	1. Fixed compatibility issues with Canon 1DX cameras. 2. Added Multi (stroboscopic function).	2015-10-27
